I thought the USA was based on free speech! Christian radio does not get it's funding from the US government, and should not be regulated as to content. KLove radio is an upbeat, healthy listening environment that encourages me and others in my community. We laugh along with the dj's and we pray with and for some of the listeners who call in with problems. KLove radio connects communities across the USA and keeps us aware that we are all alike in so many ways. Black, white, yellow, brown, no matter what your skin color KLove helps keep us real to God's love and reminds us that we are all alike as His children and that we should treat each other with love and consideration.

Please keep Christian Radio free for the people that love it.
